Navelink Release Notes v0.10.0 -1

Navelink version 0.10.0 -1 is based on (same as) MCP v0.10.0.

Identity Registry

- Certificate signing requests (CSR) has been implemented as an experimental feature
This feature allows an actor to create its own private-public key pair, and then send the public key to be signed by Navelink.
- Addition of MMS entity type
- Added home MMS URL as an optional attribute for entities
- Added possibility of having a secondary MRN for entities
This is foreseen to be used in future to enable a master MRN complemented by secondary MRN.
- Stability improvements and security upgrades

Service Registry

- No changes
