Navelink Release Notes v1.1.1

Service Versions

We have implemented a Navelink Platform Version, separate from the service versions below. This release has *Navelink* version number v.1.1.1, but uses services with the following versions:

- Management portal: 0.12.0
- Identity Registry (MCP release version): 1.1.0
- Service Registry: 1.0.0

Release Scope

PKI

- The project is now targeting Java 11 instead of Java 8
- The PKI and CLI parts of the project have now been split into separate modules. This was done so projects that import the PKI library don't also have to import the CLI functionality
- Better handling of OCSP error cases
- More extensive Javadoc in code
- Upgraded to Bouncy Castle 1.71
- General code cleanup and refactoring
- Various dependency upgrades

Identity Registry

- The project is now targeting Java 17 instead of Java 8
 - This includes some small refactorings to align with Java 17 specific syntax
- Upgraded to Spring Boot 2.6.6
- Upgraded to Keycloak adapter 17.0.1
- Updated the functionality of the endpoint for getting the list of roles of the current user to also be able to get the list of roles in an organization that the user is acting on behalf of
- Added more OpenAPI documentation in code

- General code clean up and refactoring
- Various dependency upgrades
- Minor bug fixes

Keycloak SPI Providers

- The project is now targeting Java 11 instead of Java 8
- Upgraded to Keycloak 17.0.1
- Refactored code to use Apache HttpClient 5 instead of version 4
- Fixed a bug that caused the `ais_type` attribute to not be imported when using the certificate authenticator
- Various dependency upgrades
- General code cleanup and refactoring

Release details

The schedule for the release is as follows:

1. 2022-09-06 08.00-12.00 CEST - Update Development and Test environments to v.1.1.1.
2. Confirm with customers that everything is working satisfactorily.
3. Update the operational environment – time and date TBA in a banner on Navelink.org and Developer Forum on 15/9-22

Other

There is a known bug where users sometimes need the role Service Admin to register new services. We are working on a fix for this issue. If you need help assigning this role to your users, you can contact Navelink support (info@navelink.org).
